

8. Next steps

Congratulations, you've taken your first steps into a larger world of deep learning!

You can see more about using TensorFlow at the [TensorFlow website](#) or the TensorFlow [Github project](#). There are lots of other resources available for TensorFlow, including a [discussion group](#) and [whitepaper](#).

If you make a trained model that you want to run in production, you should also check out [TensorFlow Serving](#), an open source project that makes it easier to manage TensorFlow projects.

If you're interested in running TensorFlow on mobile devices try [the second part of this tutorial](#) which will show you how to optimize your model to run on Android.

Or just go have some fun in the [TensorFlow Playground](#)!

This codelab is based on Pete Warden's [TensorFlow for Poets](#) blog post and this [retraining tutorial](#).
